Franly Álvarez Varona

Cotacachi, Ecuador • Available for remote work • +593 93 969 7566 • alvarezfranly@gmail.com

Front-end developer in training, focused on creating functional and responsive web interfaces. I combine solid technical knowledge (HTML, CSS, Tailwind, JavaScript) with customer service experience. I bring a unique perspective centered on usability and end-user experience. I am looking for an opportunity to contribute and continue growing in a professional software development environment.

PROFESSIONAL EXPERIENCE

Movidelnor EP | *Pre-Professional Internship Project*   **Ibarra, Ecuador**
Front-End Developer   *April 2023 – July 2023*

- I developed and implemented a road death counter for the corporate website, using HTML, CSS and pure JavaScript.
- I ensured that the widget was responsive and high-performing, integrating efficiently into the existing mobility company portal.
- The tool is in production, being used by citizens for road safety awareness.

Movidelnor EP | *Graduation Project*   **Ibarra, Ecuador**
FullStack Developer   *October 2024 – Jun 2025*

- I designed and built a complete web system (Statify) for the registration, reporting and visualization of statistical data on incidents and accidents.
- I implemented the FrontEnd with HTML, CSS, JavaScript and Bootstrap for an intuitive and modern interface.
- I developed the BackEnd with PHP, MySQL using CodeIgniter 3 as the Framework, modeling the database and creating the logic for user and data management.
- I delivered a functional solution that automates manual processes, improving the accuracy and accessibility of information.
